Software Development II Lab Report

Course Code: CSE 3644

Course Title: Software Development II Lab

Submitted To :

Shahriar Rahman,

Adjunct Lecturer

Department of CSE

International Islamic University Chittagong (IIUC)

Submitted By :

Safat Bin Mannan

ID: C233130

Section: 6DM

Semester: 6th

1. Introduction

The Software Development II Lab course introduced modern application development using Flutter. I developed a responsive personal portfolio application to demonstrate the knowledge gained from the course.

2. Project Overview

Main Features:

- Responsive UI
- About Me
- Skills
- Education
- Contact
- GitHub integration
- Email contact button
- Modern dark theme

3. Technologies Used

- Flutter
- Dart
- Material Design
- url_launcher
- Git & GitHub

4. Implementation of Course Learning

Flutter widgets (Row, Column, Container, Wrap, Text, Image, ElevatedButton, OutlinedButton and SingleChildScrollView) were used. MediaQuery was used for responsive layouts. The url_launcher package was integrated for GitHub and email links.

5. Learning Outcomes

- Flutter development
- Responsive UI
- Widget organization
- External package integration
- Git & GitHub

6. Challenges Faced

- Responsive layouts
- UI design

- Widget arrangement
- Integrating external links
- Project organization

7. Conclusion

This project strengthened my understanding of Flutter development and responsive UI design while improving my practical software development skills.
